

# Want to know how you can do more?

Here's our top tips on how you can live more with less energy.

## Switch to LED bulbs

Get more lighting that lasts and waste less energy by switching your light bulbs to LEDs.

## Install a more efficient showerhead

Save more water and use less power by choosing an efficient shower head or flow restrictor.

## Getting a new car?

Why not purchase an electric vehicle? Use more clean energy, and less fossil fuel by buying an EV and charging it overnight at home.

## Share car trips

Make school drop offs fun and spend more time with friends by ride-sharing to class, sports and other activities.

## Hold a clothes swap

Have more fun with your friends or colleagues by hosting a clothes swap. Store less clothing you don't need and get a "new" wardrobe all at once.

## Start a veggie garden

Get in the sunshine and create less carbon by growing your own veggies. It's also fun to do with kids!

## Buy things that last

Enjoy more quality and create less rubbish by buying goods that are made to last.

## Video conference more

Spend more time doing and less time travelling by video conferencing instead of flying.

## Encourage your team to commute without a car

Promote a healthier workforce with staff that use less fossil fuel, be encouraging them to walk, run, bike, bus or scooter to work

## Buy consciously

Support responsible businesses like yourselves and waste less energy by choosing sustainable goods and services. Check the label or ask a customer service representative if you're not sure.
